●●● Zetafax: Fax software solutions for business ●●●

Fax software for business from the fax software experts ●●●

Equisys is a trusted global provider of software packages for document creation, delivery and management. With over 60,000 customers worldwide, it is renowned for software that is reliable and simple to manage. Its award-winning network fax software, Zetafax, is installed in 106 countries and supported by a global network of partners.

Zetafax - the only fax software you'll ever need

Suitable for all sizes of business ●●●

Zetafax systems start with 5 users and scale up for any number of users across multiple departments or sites. Zetafax is easy to install, intuitive to use and requires minimal support.

Zetafax comes with 2 fax lines as standard, and up to 100 lines can be supported on a single fax server. Fax hardware supported includes analogue and digital fax boards from Brooktrout, Eicon and Intel Dialogic, as well as V.34 modems.

Zetafax feature highlights ●●●

Flexible range of easy to use features

- Intuitive fax client with address book, system tray alert, preview pane and full-feature toolbar
- Zetafax Email Gateway makes faxing as easy as email
- Optional FaxBroadcast add-on for faxing to large numbers of recipients*
- Automatic conversion of inbound faxes to PDF format, so incoming faxes can be forwarded to anyone
- Choice of addressing options including integrated Microsoft Outlook address books and Zetafax private and public address books
- Delayed 'off-peak' faxing feature to save call charges
- Choice of manual or automated routing of inbound faxes with support for Direct Dial Inward (DDI) fax numbers, BRI and PRI (digital fax lines) as standard

* Available early 2006

"After testing seven fax server solutions, Ryanair chose Zetafax based on its cost, performance and ease of installation."

Ryanair

Designed to work with your existing systems

- Native integration with Microsoft Exchange and Lotus Domino
- Latest Microsoft and Lotus platform support
- Microsoft Office add-ins for one-click faxing from any Microsoft Office application
- Zetafax API available for integrating Zetafax with other applications
- Web Client, for managing faxes from any networked PC
- Optional integration with Goldmine CRM

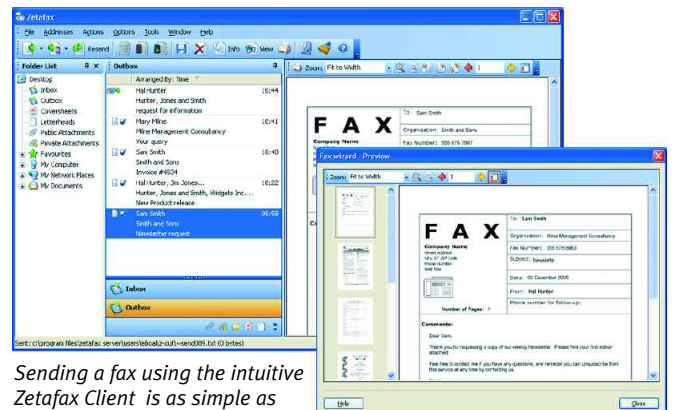

Works with your existing infrastructure ●●●

Zetafax is designed to work with your existing IT systems. For instance, you can use your email client's address book to store your fax numbers.

If you have an IP phone system you can use Zetafax to send and receive faxes without having to add additional phone lines or install and maintain additional fax hardware.

Faxing without having to leave your desk ●●●

Zetafax supports inbound routing via DDI and DTMF, so faxes can be sent directly to and from any networked PC. You can send almost any document as simply as sending an email.

Sending a fax using the intuitive Zetafax Client is as simple as point, click, fax

Integrates with common business applications ●●●

Zetafax lets you send and receive faxes just like emails. It provides native integration with Microsoft Exchange & Lotus Domino and is easy to integrate with any other SMTP email system.

To automate faxing from other software such as CRM or accounting systems, the fully supported Zetafax API Toolkit is designed specifically for Visual Basic and C++/COM programmers.

Highly intuitive and simple to manage ●●●

You can install and roll out Zetafax quickly across your business from a single PC using Windows Group Policy, and support for Active Directory minimizes network administration.

Once Zetafax is installed, the automatic Zetafax Update Service alerts you to new fixes and updates for your server and clients, so you can keep your system completely up to date.

Easy to manage and very low maintenance

- Fully scalable, supporting up to 100 lines on a single server
- Range of fax devices supported, including V.34 modems, ISDN adaptors and intelligent fax boards from Brooktrout, Eicon, Intel Dialogic, and T.38 IP phone systems
- Support for Windows Group Policy makes it easy to install multiple Zetafax Clients from one central location
- Active Directory integration means no client reconfiguration is needed at the desktop
- Automatic Update Service ensures access to the latest product features and updates
- Advanced server queue management for reprioritizing, aborting or rushing of faxes
- Junk message filter blocks incoming faxes from specific fax senders

“The introduction of Zetafax has significantly reduced the time taken for information to reach our customers which in turn has increased staff productivity.”

Swiss Life

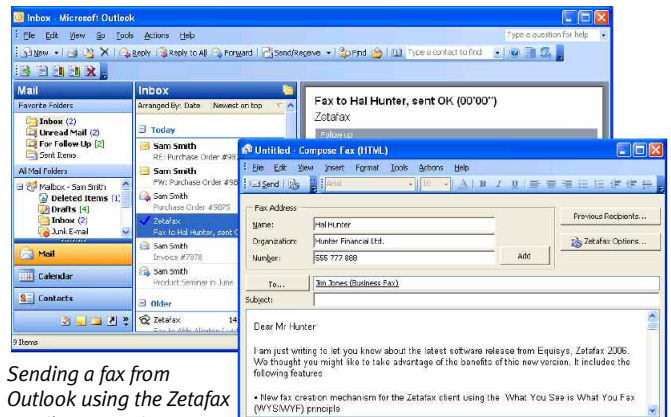

Fully supported ●●●

Zetafax customers can access a rich source of support advice and technical tips via the web-based Zetafax Knowledge Base. Telephone and email support is also available from our experienced support teams.

Integration-ready for software vendors ●●●

If you are an Independent Software Vendor (ISV), you can embed Equisys fax technology into your application in order to add value and enhance your brand, by using the Zetafax CommsEngine. The CommsEngine lets you add a new, differentiating feature to your product with minimal development cost, and fast time to market. Ask for the Zetafax CommsEngine datasheet.

Sending a fax from Outlook using the Zetafax Email Gateway is as easy as sending an email

Enhance your Zetafax system with a range of add-on options ●●●

Software Assurance and Support: Software Assurance provides all upgrades, updates and service packs. Telephone and email support is also available. Please ask for details.

Additional user license packs: As your staff numbers grow, you can buy additional user licenses in packs of 5, 10, 25, 50 or 100.

Document Conversion add-on: Convert up to 250 file types to fax TIFF format, providing enhanced functionality.

Zetafax SMS Gateway: Send text messages to mobile phones from your PC. Ideal for sending reminders or alerts to staff and customers. Requires GSM modem.

Additional line packs: For heavier fax traffic or larger numbers of users, you can expand your Zetafax system to support additional fax lines.

FaxBroadcast for Zetafax: Manage fax broadcasts to a large number of recipients.

API Toolkit: Integrate Zetafax with your existing software such as accounting or CRM systems, for automated, effortless faxing.

Zetafax Corporate Edition add-on: For larger businesses with just a few fax users, provides support for clustered Microsoft Exchange servers, Windows child domains and Least Cost Routing.

Reasons to buy Zetafax ●●●

A proven and reliable product: Launched in 1991, Zetafax is used by over 60,000 businesses in 106 countries

Faster, more efficient faxing: Faxing with Zetafax is up to 80% quicker than with a standard fax machine. Inbound faxes can be routed to individual desktops along with your email

Easy to manage: Installation and configuration are both fast and simple. Once installed, the Zetafax Update Service alerts you to new upgrades and updates so your system is always up to date

Easy-to-use: Anyone can get to grips with Zetafax in minutes. The intuitive client helps you organize your fax communications quickly and efficiently

Seamless integration with email: Native integration with Microsoft Exchange and Lotus Domino means you can manage faxes and emails together

Fully supported: There is a rich source of support advice and technical tips available from the Equisys website, and phone and email support is available from our experienced support teams
